Fourth edition of eLearning Awards is launched

European Schoolnet, together with principal partner Young Digital Poland, launch the fourth edition of the prestigious eLearning Awards. The eLearning Awards reward the best examples of the use of Information and Communications Technology (ICT) in education by schools in Europe. Since 2001, a total of €137 000 in prize money has been awarded.

New Services For Learning Resources

Successful completion of the European Treasury Browser project paves the way for new European Learning Resources (ELR) service starting 2003.

Repository owner, are you interested in joining?

Do you want to receive:
* Quality approved online European educational resources?
* Multilingual resources keyworded by audience, subject, language?
* European resources that have never been indexed by your national educational website before?

Propose Quality Resources

Everybody can take part in building up the BEST European web-based learning resources network! Are you a teacher with some good resources to propose? Or do you have your own repository of web-based learning resources? Either way, here you can find out what to do.

ETB Thesaurus is Ready

Final version of the ETB Thesaurus is available in nine (9) languages! They are English, French, German, Italian, Spanish, Swedish, Danish, Greek and now also Hebrew. Take your time and see for yourself the value of this tool!

Who is posting to the ETB-network?

You can find high quality learning resources from the ETB-network. **But where do those resources come from?** Currently there are six (6) repositories posting to the network. Interested in their collection and quality policy? Find out detailed information here.

Jump to

Look for learning resources in ETB!

Have a repository of learning resources? Want to join ETB? Fill in the application here.

ETB Handbook

Celebrate

This project will outline a pedagogy for the design and use of collaborative and interoperable Learning Objects in integrated learning environments.

Project Objectives

Context eLearning with Broadband Technologies (CELEBRATE) was a large-scale 30-month demonstration project (ending in Nov. 2004)) co-ordinated by European Schoolnet and supported by the European Commission's Information Society Technologies Programme (IST). It addressed all parts of the educational content value chain and involved 23 participants including Ministries of Education, universities, leading educational publishers, content developers, VLE vendors and technology suppliers from 11 countries.

Key questions that the project attempted to answer were:

- Do teachers actually like these new types of learning resources and do LOs support innovative forms of teaching and learning with ICT?

Welcome

Welcome to the MELT project. MELT has been designed to provide users of learning content in schools with access to more useful types of metadata that will allow them to find resources that fit their needs, language, cultures and preferred ways of teaching and learning.

A teacher describes what he's found whilst testing the MELT LRE portal

Arto, Finland.

iTEC

iTEC (Innovative Technologies for an Engaging Classroom) is a four-year, pan-European project focused on the design of the future classroom.

With funding of €9.45M from the European Commission, the involvement of 15 Ministries of Education and school pilots in up to 1 000 classrooms in 12 countries, iTEC is the largest and most strategic project yet undertaken by European Schoolnet and its supporting Ministries.

"As for the future, your task is not to foresee it but to enable it."

Antoine de Saint-Exupery

Semantically Enhanced Multifaceted Collaborative Access to Cultural Heritage

FACING THE PRESENT...

THROUGH CULTURAL HERITAGE

WHY IS MOSAICA a cultural heritage project ?

MOSAICA is all about creating a colourful and diversified mosaic of cultures, traditions, and legacies that will grow and evolve, enabling varied actors to use technological means to express their national, ethnic and religious identity, values, and legacy.

Uncommon Culture - the ATHENA journal

Uncommon Culture provides unique

ATHENA, presented as a Network of Best Practice within the **eContentplus Programme**, takes its origins from the existing **MINERVA** network.

ATHENA will bring together relevant stakeholders and content owners from museums and other cultural institutions all over Europe and evaluate and integrate specific tools, based on a common agreed set of standards and guidelines to create harmonised access to their content.

ATHENA will contribute in the content provision to **Europeana**.
